- **Architecture:** MVVM, Clean Architecture, Modular Codebase
- **Tools & DevOps:** Git, Android Studio, VS Code, Firebase, FCM, Postman
- **Backend Integration:** REST APIs, Firebase Messaging, Firebase Auth, SQLite, Room
- **Cross-Platform Focus:** Flutter, Android, iOS
- **Remote Skills:** GitHub, Jira, Zoom

🔹 Professional Experience

Sr. Flutter & Android Developer
Shriram Automall India Ltd – Remote/New Delhi
📅 *May 2022 – Present*

- Implemented a modular architecture using Flutter and Dart, resulting in **35%** faster build times and a **20%** reduction in code duplication across all mobile application projects.
- Migrated legacy Android modules to Flutter for faster scalability and iOS deployment.
- Implemented push notifications, real-time bidding, and analytics with Firebase, improving customer engagement by **25%**.
- Collaborated with remote backend and QA teams using Jira.

Android Developer
Rigo Tech (India) Pvt Ltd – Remote/Delhi
📅 *June 2020 – April 2022*

- Developed 6+ Android apps in Kotlin used by **10K+ active users**, enhancing load times by **20%** through optimized data handling.
- Integrated Google Maps, Paytm, Firebase Auth, and Razorpay for secure, user-focused apps.
- Used **ViewModel** for scalable state management across modules.
- Designed custom UI components, achieving 100% adherence to design specs in cross-functional teams.

Android Developer
Milkyway Services Pvt Ltd – Noida
🗓 *March 2019 – May 2020*

- Maintained and upgraded logistics and media Android apps, boosting crash-free user experience to **99.2%**.
- Added map tracking, media uploads, and analytics to logistics-based apps.
- Started Flutter migration for lightweight internal tools.

Android Developer
Pry Infosoft Pvt Ltd – Narnaul
🗓 *November 2017 – February 2019*

- Built and deployed native Android apps using Java for education and local services, some with **5K+ downloads**.
- Optimized layouts for varied screen sizes, increasing usability ratings by **15%**.

🔹 Education

- **B.Tech – Computer Science & Engineering** – GGSIPU, Delhi (2017)
- **Diploma – Computer Science & Engineering** – IETE Delhi (2013)

🔹 Certifications

- Flutter Bootcamp – Udemy
- Android App Development – Tata CMC, New Delhi
- Java Programming – NIELIT, New Delhi

🔹 Projects

- **MySamil** – Customer-facing app for Shriram Automall India Ltd enabling registration, KYC uploads, live bidding, and deposit management. **500K+** downloads on Play Store
- **TeamSamil** – A internal Android/iOS application streamlining inventory management, bidding, proxying, and receipting processes for **120+** Automall staff, leading to a **20%** increase in operational efficiency.
- **Adroit Auto** – Inspection app for Adroit Services, enabling authorized users to perform vehicle inspections and valuations with guided capture of documents, images, and videos.
- **ThePriceX** – Vehicle pricing tool by Shriram Automall India Ltd using ML and statistical models to deliver accurate valuations in just three steps.
- **RiGO** – Cab booking app for daily, rental, and outstation rides with real-time ride request dispatch from passenger to driver app.
- Kuka Talks, Royal Club International, The 9 Months, Weather Guide

---

🔹 Proficiencies

- Excellent written & verbal communication
- Able to manage deadlines and organize daily tasks independently
- Comfortable working with distributed teams
- Focused on writing maintainable, well-structured code
